Daily Standup Meeting

Project Name: Betting systems for games	Group Name: Seven Logistics
Sprint Number: 7	Date and Time: 16 March 2026, 13:45 - 14:45

List of attendance:

- Name: Nunkoo Riya Attended? YES
- Name: Hau Yam Seung Mélanie Attended? YES
- Name: Coret Mégane Attended? YES
- Name: Ramtohul Syrielle Attended? YES
- Name: Sedoyeka Rayan Attended? YES

Project Progress:

Team Member (1): Name: Nunkoo Riya

1. What did you accomplish yesterday?
   Answer:
   - Research on machine learning in c#
   - Learning on AI agents and their uses
   - Completing pending work

2. What will you do today?
   Answer:
   - Discuss on tasks that are to be implemented for betting app
   - Finalise the overall mechanism for how the odds will be calculated and confirming the bets to be static and pre-match.
   - Work on project report – the data structures section

3. What obstacles are impeding your progress?
   Answer:

Team Member (2): Name: Hau Yam Seung Mélanie

1. What did you accomplish yesterday?
   Answer:
   - work on the gantt chart
   - work on the project management report
   - verify development progress via commit push history, weekly standup documentation and a Dev member

2. What will you do today?

Answer:

- Continue working on the report and any impending task

3. What obstacles are impeding your progress?
   Answer:

<u>Team Member (3): Name:</u> Coret Mégane

1. What did you accomplish yesterday?
   Answer:
   - Implemented a class for the football match results.
   - Added code to fetch game results from database.
   - Implemented a class for the football players.
   - Wrote code to fetch players from the database.
   - Reviewed the codes to fetch odds, bets and history from database.
   - Implemented code to filter bet slips by both date and status.
   - Created user controls to for the bet slips.
   - Created user controls to for the bets found in a slip.
   - Completed main page UI and linked to backend.
   - Worked on the history page UI and linked to backend.
   - Wrote SQL Statements to populate Bet Type Table.

2. What will you do today?
   Answer:
   - Complete history page UI.
   - Review how to properly link the WinForms pages.
   - Add a class to handle navigation and centralise shared data across pages
   - Work on the code for simulating matches
   - Implement backend functionalities for the admin panel.
   - Work on the UI for the admin panel.

3. What obstacles are impeding your progress?
   Answer:
   - Uncertainty on how to approach the match simulation feature.
   - STL data structures were used instead of custom implementations, which was not aligned with the project requirements and necessitated code refactoring.

<u>Team Member (4): Name:</u> Ramtohul Syrielle

1. What did you accomplish yesterday?
   Answer:
   - Populated tables using data from API
   - Added a class for bet slips and individual bets.
   - Added a class for odds.
   - Set up backend logic to retrieve existing bet slips from database.

- Added in-memory handling for adding/removing bets from a slip.
- Integrated backend functionality to save bet slips after payment confirmation.
- Finished frontend development of bet slip page.
- Implemented backend fetching of odds data from database.
- Resolved bugs in notification class.

2. What will you do today?
   Answer:
   - Revise files for populating tables
   - Fix SQL code to resolve foreign key conflicts
   - Make sure base forms properly support resizing when applied to new pages
   - Implement logic on bet slip page to update total payout dynamically when stake is entered

3. What obstacles are impeding your progress?
   Answer:
   - Some game results in data source files not rendering correctly.
   - SQL code raising foreign key constraints.
   - SSMS is sometimes restrictive when performing database schema changes.

Team Member (5): Name: Sedoyeka Rayan

1. What did you accomplish yesterday?
   Answer:
   - Odds Methodology research for creating the odds generation algorithm.
   - Created classes to handle match outcome algorithm .
   - Created classes to handle double Chance Odds .
   - Created classes to handle over or under goal odds.
   - Created classes to handle Both teams to score.

2. What will you do today?
   Answer:
   - Create classes to handle Total corners.
   - Create classes to handle yellow cards and red cards odds respectively.
   - Add odds auto generator services codes.
   - Add odds model codes that add helpers to hold odds generation info.

3. What obstacles are impeding your progress?
   Answer:
   Finding free current datasets to use to populate database for odds generation.

"Alone we can do so little; together we can do so much." – Helen Keller
