Daily Standup Meeting

Project Name: Betting systems for games	Group Name: Seven Logistics
Sprint Number: 8	Date and Time: 23 March 2026, 14:30 – 15:25

List of attendance:

- Name: Nunkoo Riya Attended? YES
- Name: Hau Yam Seung Mélanie Attended? YES
- Name: Coret Mégane Attended? YES
- Name: Ramtohul Syrielle Attended? YES
- Name: Sedoyeka Rayan Attended? YES

Project Progress:

Team Member (1): Name: Nunkoo Riya

1. What did you accomplish yesterday?
   Answer:
   - Studying more on time complexity of data structures
   - Edit the brainstorm diagram by adding the features for admin
   - Start editing the research doc to put on repo

2. What will you do today?
   Answer:
   - Update the Gantt chart according to the task completed
   - Start drafting pseudocodes for data structures
   - Update general structure of project report and rework on the introduction and design section of report.

3. What obstacles are impeding your progress?
   Answer:

Team Member (2): Name: Hau Yam Seung Mélanie

1. What did you accomplish yesterday?
   Answer:
   - Keep updated about progress through group messages
   - Discuss with the scrum master for any shared tasks

2. What will you do today?
   Answer:
   - Record any meeting discussion key points

- Ask about progress and challenged

3. What obstacles are impeding your progress?
   Answer:
   - Managing workload alongside other tasks

Team Member (3): Name: Coret Mégane

1. What did you accomplish yesterday?
   Answer:
   - Implemented SessionManager class to handle navigation and centralise shared data across pages.
   - Update forms to use shared data from SessionManager class and to call its methods when changing page.
   - Added popup to confirm logging out or application exit.
   - Completed bet history page.
   - Added class to represent football match results.
   - Added class to fetch game results from database.
   - Added code to insert new match in database and randomly generate match results.
   - Added code to insert game results in database.
   - Completed page for admin to add new match.

2. What will you do today?
   Answer:
   - Implement custom data structures.
   - Complete code for simulating matches and automatically updates database.
   - Implement page for admin to view and browse matches.
   - Research on AI Agent implementation.

3. What obstacles are impeding your progress?
   Answer:
   - Lack of data source to train model for AI Agent.
   - Lack of data to test match simulation feature.
   - Difficulty in writing query to update individual bets based on user selection and match results.

Team Member (4): Name: Ramtohul Syrielle

1. What did you accomplish yesterday?
   Answer:
   - Reviewed files for database population to identify irregularities.
   - Modified data source files to fit BULK INSERT constraints.
   - Added temp tables in SQL code to populate tables instead of directly using BULK inserts.
   - Fixed SQL code to eliminate foreign key constraints.

- Added logic to bet slip page so total payout updates dynamically.
- Ensured proper resizing of the Base Form.

2. What will you do today?
   Answer:
   - Continue refining table population files.
   - Extend SessionManager with methods to handle navigation to active bet slip page.
   - Optimise and test SQL queries.
   - Come up with different realistic ideas for AI integration.
   - Document potential approaches.

3. What obstacles are impeding your progress?
   Answer:
   - Implementation of some viable AI agent concepts hindered because of time constraints.
   - High-value integrations not feasible within current project timeline.

Team Member (5): Name: Sedoyeka Rayan

1. What did you accomplish yesterday?
   Answer:
   - Searched for team ratings, player ratings datasets.
   - Create a SQL algorithm to generate player ratings.
   - Create mock dataset and mock SQL to test odds generation codes.
2. What will you do today?
   Answer:
   - Move inline SQL code for odds generation code to DatabaseManager .
   - Test Odds generation codes and fix bugs.
   - Make final update on database population SQL code.
   - Change dependencies so as odds to can be run on a Windows with Visual Studios.
3. What obstacles are impeding your progress?
   Answer:
   - Microsoft SQL Server connection issues with my MacBook through Docker.

"Alone we can do so little; together we can do so much." – Helen Keller
