Daily Standup Meeting

Project Name: Betting systems for games	Group Name: Seven Logistics
Sprint Number: 6	Date and Time: 9 March 2026, 13:50 - 14:32

List of attendance:

- Name: Nunkoo Riya Attended? YES
- Name: Hau Yam Seung Mélanie Attended? YES
- Name: Coret Mégane Attended? YES
- Name: Ramtohul Syrielle Attended? YES
- Name: Sedoyeka Rayan Attended? YES

Project Progress:

Team Member (1): Name: Nunkoo Riya

1. What did you accomplish yesterday?
   Answer:
   - complete visualisation diagrams such as gantt chart and use case diagram
   - edit technical report for project management

2. What will you do today?
   Answer:
   - Review progress with stakeholder (lab tutor)
   - Discussion and reflection on overall project progress

3. What obstacles are impeding your progress?
   Answer:

Team Member (2): Name: Hau Yam Seung Mélanie

1. What did you accomplish yesterday?

   Answer:

   - Did a rough sketch of the activity diagram.
   - Did research on diagrams.
   - Review any diagrams sent by other members.

2. What will you do today?
   Answer:

- Keep up with progress and updates
- Ask if my help is needed

3. What obstacles are impeding your progress?
   Answer:
   - No major issues

Team Member (3): Name: Coret Mégane

1. What did you accomplish yesterday?
   Answer:
   - Completed implementing the backend functionalities to fetch teams, leagues and matches from database.
   - Completed the code to filter matches by league and team's name.
   - Completed the activity diagram.
   - Completed the use case diagram.
   - Created user controls to dynamically display matches and leagues on Main Page.

2. What will you do today?
   Answer:
   - Continue working on the Main Page interface.
   - Add a table in the database to store the football match results.
   - Populate the table for bet types.
   - Implement code to filter bet slips in history by date and status.
   - Do the bet history page UI using WinForms.
   - Do the popup UI for viewing bets in history page using WinForms.

3. What obstacles are impeding your progress?
   Answer:
   - Difficulties on binding the bet buttons on Main page to the corresponding bet type and selection value.
   - Difficulty to test adding bets to bet slip due to lack of data source and uncertainty on generating odds.

Team Member (4): Name: Ramtohul Syrielle

1. What did you accomplish yesterday?
   Answer:
   - Completed BaseForm class.
   - Developed notification class to manage user feedback.

- Developed backend validation functions for wallet popup.
- Used API to gather data on matches, players, leagues and teams.

2. What will you do today?
   Answer:
   - Populate tables using data from API.
   - Implement a class for the bet slips and the bets.
   - Add backend functionality to fetch bet slips from the database.
   - Implement code to add and remove bets from the slip (in-memory).
   - Add backend functionalities to save bet slips to database after payment.
   - Add backend functionalities to fetch the odds from the database.
   - Do the bet slip page.
   - Fix the notification class.
   - Fix page interaction.

3. What obstacles are impeding your progress?
   Answer:
   - Notifications not triggering properly
   - API structure not matching database schema
   - Reshaping API response before populating tables

Team Member (5): Name: Sedoyeka Rayan

1. What did you accomplish yesterday?
   Answer:
   Pushed the BettingSystemTests.Tests.cs program folder into the shared repository which included the DatabaseManager.cs, AppUserTests.cs, ValidationTests.cs, WalletServiceTests.cs files.

2. What will you do today?
   Answer:
   Write the table of test cases for the DatabaseManager.cs and WalletServiceTests.cs.

3. What obstacles are impeding your progress?
   Answer:

"Alone we can do so little; together we can do so much." – Helen Keller
