Daily Standup Meeting

Project Name: Betting systems for games	Group Name: Seven Logistics
Sprint Number: 4	Date and Time: 16 February 2026, 14:45 –15:28

List of attendance:

- Name: Nunkoo Riya Attended? YES
- Name: Hau Yam Seung Mélanie Attended? YES
- Name: Coret Mégane Attended? YES
- Name: Ramtohul Syrielle Attended? YES
- Name: Sedoyeka Rayan Attended? YES

Project Progress:

Team Member (1): Name: Nunkoo Riya

1. What did you accomplish yesterday?
   Answer:
   - Finished setting up SSMS on local machine
   - Finished setting up the different branches for tester and developer for github

2. What will you do today?
   Answer:
   - Learn using WinForms
   - Updating the Gantt chart
   - Help in designing some features
3. What obstacles are impeding your progress?
   Answer:
   - The visual studio owned on local machine does not support .NET framework and is not allowing proper rendering for WinForms

Team Member (2): Name: Hau Yam Seung Mélanie

1. What did you accomplish yesterday?
   Answer:
   - Keep up to date with any progress
   - Assist with anything required

2. What will you do today?
   Answer:
   - Keep up with progress and updates

3. What obstacles are impeding your progress?

Answer:

- No major issues

Team Member (3): Name: Coret Mégane

1. What did you accomplish yesterday?
   Answer:
   - Fixed DPI scaling issue.
   - Completed the functionalities for user's digital wallet.
   - Selected the main data structures to use and provided justifications for the choices.

2. What will you do today?
   Answer:
   - Design the user's profile page using WinForms.
   - Design a popup for user to edit their details.
   - Design a popup for user to modify their password.
   - Develop backend functionalities to update user's profile and password.
   - Link profile page and popups to backend functionalities.

3. What obstacles are impeding your progress?
   Answer:
   - Difficulties to implement a scrollable form.
   - Took time to properly update details displayed on form when user updated their details.
   - Experienced difficulties with WinForms designer code as some changes broke the code.

Team Member (4): Name: Ramtohul Syrielle

1. What did you accomplish yesterday?
   Answer:
   - Completed frontend functions to indicate valid/invalid input to user
   - Completed frontend validation for wallet popup
   - Implemented responsive design using code for adaptation to different screen sizes.
   - Helped to select the main data structures.

2. What will you do today?
   Answer:
   - Type-in validation for password change
   - Add error message to guide users when input is invalid
   - Link password change frontend to backend
   - Document backend integration
   - Create custom controls for rounded panels, buttons and textboxes as reusable classes

3. What obstacles are impeding your progress?
   Answer:
   - Error messages not displaying in correct location
   - Need for additional adjustments
   - Compiler behaviour causing entire build to fail is there is error in the code

Team Member (5): Name: Sedoyeka Rayan

1. What did you accomplish yesterday?

Answer:

- Prepared a draft of test cases to cover for DatabaseManager.cs file and Validation.cs file and read on how to write integration tests and unit tests.

2. What will you do today?

Answer:

- Write the integration test code for the first draft of the DatabaseManager.cs code and the unit test codes for Validation.cs code.

3. What obstacles are impeding your progress?

Answer:

- The DatabaseManager.cs code was written with windows dependencies like winforms and use .NET 10.0 framework for windows which my pc cannot use due to it having MacOS

"Alone we can do so little; together we can do so much." – Helen Keller
