Daily Standup Meeting

Project Name: Betting systems for games	Group Name: Seven Logistics
Sprint Number: 2	Date and Time: 2 February 2026, 14:00 – 15:12

List of attendance:

- Name: Nunkoo Riya Attended? YES
- Name: Hau Yam Seung Mélanie Attended? YES
- Name: Coret Mégane Attended? YES
- Name: Ramtohul Syrielle Attended? YES
- Name: Sedoyeka Rayan Attended? YES

Project Progress:

Team Member (1): Name: Nunkoo Riya

1. What did you accomplish yesterday?
   Answer:
   - learning on data structures that could be used in the context of betting
   - learn about pseudocode syntax

2. What will you do today?
   Answer:
   - Plan out the general layout of the application
   - Discuss on the structures that are to be designed in pseudocode
   - discuss on main functions to be implemented in the code
   - Discuss on the main betting structure
   - plan on what type of data can be stored and how the data are used
   - draft potential requirements

3. What obstacles are impeding your progress?
   Answer:
   - Lack of research on how to obtain all functional and non-functional requirements

Team Member (2): Name: Hau Yam Seung Mélanie

1. What did you accomplish yesterday?
   Answer:
   - Keep updated on team's progress.

2. What will you do today?
   Answer:

- Discuss on the main betting structure

3. What obstacles are impeding your progress?
   Answer:
   - Limited knowledge on the overall project

<u>Team Member (3): Name:</u> Coret Mégane

1. What did you accomplish yesterday?
   Answer:
   - Completed the initial draft for the application interface using Canva.
   - Researched on the functional and non-functional requirements.
   - Researched the information that needs to be store in the database.
   - Researched how to connect to and interact with a database in C#.

2. What will you do today?
   Answer:
   - Discuss on the betting mechanism, including how the bets will be simulated (pre-match or live), and which types of bets will be implemented.
   - Document the functional and non-functional requirements.
   - Design the ER diagram.
   - Write SQL statements to set up the database.
   - Implement validation for registration and login.
   - Develop the backend functionalities for registration and login, including database interactions.
   - Research on data structures.

3. What obstacles are impeding your progress?
   Answer:
   - Lack of a data source to populate the database tables.
   - Difficulty understanding how to calculate and store betting odds.

<u>Team Member (4): Name:</u> Ramtohul Syrielle

1. What did you accomplish yesterday?
   Answer:
   - Gain a better understanding of forms and controls for WinForms.
   - Reviewed design approach based on existing online projects.

2. What will you do today?
   Answer:
   - Research on data structures.
   - Discuss with team how key components should be displayed to the users and how animations could improve the interface.
   - Implement frontend for landing page.

- Implement frontend for login and registration.

3. What obstacles are impeding your progress?
   Answer:

   - Limited knowledge on how WinForms works in depth.
   - Difficult to develop a visually appealing interface with outdated design tools.
   - Time-consuming to experiment with layout and controls.

Team Member (5): Name: Sedoyeka Rayan

1. What did you accomplish yesterday?
   Answer:
   - Found alternatives to visual studio to address cross-compatibility issues with Mac.
   - Prepared a document to explain how the betting system should work and the bets made by user.

2. What will you do today?
   Answer:
   - Discuss on the main betting structure
   - Draft a proper document outlining each of the app's pages: to keep a documentation of a primary idea of how the overall structure of the app is structured.

3. What obstacles are impeding your progress?
   Answer:
   - Limited familiarity with testing tools and frameworks.
   - Inexperience with systematic testing methods.

"Alone we can do so little; together we can do so much." – Helen Keller
